RefID: 1, There and Back Again: A Review of Residency and Return Migrations in Sharks, with Implications for Population Structure and Management. Chapman DD, Feldheim KA, Papastamatiou Y, Hueter RE

The overexploitation of sharks has become a global environmental issue in need of a comprehensive and multifaceted management response. Tracking studies are beginning to elucidate how shark movements shape the internal dynamics and structure of populations, which determine the most appropriate scale of these management efforts.

Tracked sharks frequently either remain in a restricted geographic area for an extended period of time (residency) or return to a previously resided-in area after making long-distance movements (site fidelity). Genetic studies have shown that some individuals of certain species preferentially return to their exact birthplaces (natal philopatry) or birth regions (regional philopatry) for either parturition or mating, even though they make long-distance movements that would allow them to breed elsewhere. More than 80 peer-reviewed articles, constituting the majority of published shark tracking and population genetic studies, provide evidence of at least one of these behaviors in a combined 31 shark species from six of the eight extant orders.

Residency, site fidelity, and philopatry can alone or in combination structure many coastal shark populations on finer geographic scales than expected based on their potential for dispersal. This information should therefore be used to scale and inform assessment, management, and conservation activities intended to restore depleted shark populations. Expected final online publication date for the Annual Review of Marine Science Volume 7 is January 03, 2015.

Causes of Deaths Form

Abstract the cause of death data by the finest strata of duration of surveillance, age group, etc. as available.

1. **Strata ID** (##) ...

Data Location: Table # ... Page # ...

Surveillance year (yyyy): Start ... End ...

Age range: Unit Select an Answer | Youngest ... | Oldest ...

Urban/Rural ◯ Urban ◯ Rural ◯ Total

Sex ◯ Male ◯ Female ◯ Total

Other strata 1 ...

*Enter as "strata type-strata value"
Ex: "country-India"

Other strata 2 ...

2. Cause of Death:

Abstract causes **following the order in the artilce:** if in the table, **first from left to right, then top to bottom.**

Total (All-Cause) deaths is expressed as

◯ # of deaths

◯ % of deaths

◯ mortality ratio

◯ mortality rate

Clear Response ()

Mis-matched denominator: ...

If the only denominator presented in the article does not match the strata, please specify the denominator here.

COD_ID	**Cause of death** *exactly the same as presented in the article, no abbreviations	**Cause of death data** (follow the hierarchy): - # of Deaths (persons) - % of Deaths ([0,100]) - Mortality Ratio (per live births) - Mortality Rate (per person-years) Denominator unit for mortality ratio (live births) o (person-years) Select an Answer **Add unit options ()**
COD01	...	◯ # of Deaths ◯ % of Deaths ◯ Mortality Ratio ◯ Mortality Rate **Clear Response ()**
COD02	...	◯ # of Deaths ◯ % of Deaths ◯ Mortality Ratio ◯ Mortality Rate **Clear Response ()**
COD03	...	◯ # of Deaths ◯ % of Deaths ◯ Mortality Ratio ◯ Mortality Rate **Clear Response ()**
